

SigmaCare CRM 20.1 Release at a Glance

SigmaCare is proud to announce the enhancements provided in the 20.1 Release. Below is a list of areas within the application that will be updated. A detailed description of the updates can be reviewed in the 20.1 CRM Referral Source Management Release Notes which will be made available closer to the release date.

Web Client

- Enhanced logic to make it easier to enter the Referral Source for customers using the Allscripts prospect integration.
- Secondary Diagnosis will populate in Resident Admission information.
- Added the ability for each organization to manage their territories.

Mobile

- Added Geo-scheduling of activities on iPhones.
- Patient Referral Notes can now be added from mobile devices.
- Contacts can be added through Accounts on all mobile devices.

SigmaCare CRM – Care Management Platform

- Added ability to update the Ordering Physician, Referral Account, and Referral Contact from SigmaCare CRM.
